REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The references of Leopoldi 4,378,885 and Blood US 156,308 are cited. It is submitted that the teachings of Leopoldi 4,378,885 of a three piece design (two half shells forming an enclosure and one external ring disposed on the enclosure) in itself are not sufficient to teach how the four part container of Blood US 156,308 (two end caps and one cylinder wall forming the enclosure and an external cylindrical wall disposed on the enclosure) could have been configured in the three piece manner as is claimed. Specifically, the teachings of Leopoldi would required further modification to be applied to Blood, as the ring of Leopoldi is retained by the external flanges in his invention, as well as serving to secure the top shell to the bottom shell. There is no teaching that the two half shells of Leopoldi could be attached to each other without the

use of the ring. Accordingly, it would not be obvious to apply the teachings of Leopoldi to the container of Blood.

The teachings of Liska US 2,774,466 or Goldstaub US 2,549,681 also could not be relied upon for the necessary teachings lacking in Leopoldi and Blood, as they are both drawn to top and bottom shells which are rotatable with respect to each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
